

How to stretch a Lortone tumbler belt.

After time, or if you overload your tumbler, the drive belt can stretch. It is a very simple procedure to re-stretch it. Simply loosen the nuts circled and move them away from centre. Then re-tighten.

If this does not help, please check the belt has not slipped by unscrewing the blue case.

If the belt is worn we do supply new belts please call to order on 0870 850 0151
